384 Square Deep Well Storage Microplate

190µl square wells, V shaped bases, clear polypropylene

Overview

This plate is designed for high density sample collection and storage, for a wide array of applications within cell biology, molecular biology and drug discovery. The V shaped wells allow for complete sample retention with pipettes, and are ultra-flat for a completely uniform seal, either with adhesive or heat seals, or with our accompanying silicone [sealing mat](#) (4ti-0139).

Our plates are manufactured in cleanroom facilities which are certified free of RNase, DNase, human genomic DNA and endotoxins. We use only the highest medical grade virgin polypropylene with high resistance against chemicals such as DMSO, phenol, and chloroform.

Low DNA Binding Products

- Azenta Life Sciences offer low binding products, recommended to support sensitive techniques such as qPCR and Next Generation Sequencing (NGS), as well as storage of samples.
- Manufactured using selected low-bind polymers, DNA loss is minimized during incubation and sample transfer, making it the ideal solution for use in applications with low DNA input.
- Low binding feature results from selected low-bind polymers, no coating is used to achieve the binding characteristics. No contamination or modification of the samples.
- Tested under a broad temperature range. Maximum DNA recovery after low temperature storage and high temperature incubations.
- No detectable DNA loss during incubation steps and sample transfer in NGS sample prep and library construction. Ideally suited for sensitive applications with ultra-low nucleic acid input.

- **Quality & Material**
 - Made from polypropylene, a material with very low biomolecular binding characteristics, a high temperature tolerance and resistance to many standard laboratory chemicals, including DMSO
 - Autoclavable
 - Free from DNase, RNase, human genomic DNA, and endotoxin
- **Wells**
 - Conical V-bottoms
 - Square wells, to make the best use of space, and to improve mixing
- **Frame**
 - Alphanumeric grid reference to aid well and sample identification
 - SBS footprint
- **Use**
 - Clear plate, perfect for storage applications
 - Temperature range for use: -80°C to 120°C
 - Best for precipitation, centrifugation and small volume recovery due to the conical V bottom, as the liquid gathers at the lowest point of the V for easy pipetting
 - Stackable
 - Suitable for adhesive and heat sealing
- **Options**
 - Non-sterile as standard, sterilization available upon request; contact an expert for details and pricing
 - Available barcoded upon request; learn more about our barcoding options
 - A clear silicone sealing mat (4ti-0139) is also available to fit this product, with 384 sections to correspond with the wells of this plate
